Drone Services

DRONE SERVICES

Drone video and image footage is becoming more widely used in both corporate and broadcast programmes making the technology more affordable to everyone. We can supply pilots and drones for videos, high resolution stills, 3D mapping, orthomosaic mapping, rooftop and building surveys, along with providing event coverage for your corporate video. We can hand over the video and stills as raw footage or provide an editing service for you. Media is delivered in the format and resolutions of your choice and available to download from our secure password protected website.

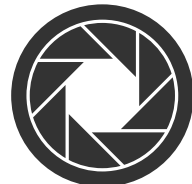

We provide a full service from initial surveys to delivering the final product, and are authorised by the CAA for commercial operations.
